

Career Summary

Date of Birth:

1976

Manuel Pacini

Project Engineer Manager

Nationality:

Italian

Manuel is a Senior Project Manager with more than 20 years of experience in the Pharmaceutical industry, with competence in the following areas: sterile production, manufacturing and packaging.

Education:

Luiss di Roma

I started my professional career as a freelancer in 2000 with Foster-Wheeler Italy as Piping Construction Supervisor in 2000 for the Sanofi-Aventis project in Anagni (Italy), after this experience and thanks to the long collaboration with Foster-Wheeler I was able to work on different projects and have the assignment as Project Engineering and Commissioning Manager.

Qualifications:

Degree in Industrial Technology (Master Level)

My career has given me the opportunity to work more than once on complex projects and with groups of different international cultures, thanks to this I have improved my skills and in particular:

Language skills:

- Italian: mother tongue
- English: Good written and spoken
- Spanish: Good written and spoken

- Leadership
- Communication
- Time Management
- Risk Management

Since 2017 as Senior Project Manager, I'm an employee of Pharmatec srl, with corporate assignments such as:

- Estimate processing
- Planning of activities
- Cost management
- Manage and expand the strategic sales plan
- Recruitment management
- Coaching and monitoring of team performance

Responsibilities and professional assignments

- Managing key projects, stakeholders and personnel, such as biochemical engineers, researchers, scientists, healthcare consultants and physicians.
- Develop project capital project management including budget estimating, scheduling, vendor negotiations, and project plan execution.
- Implement project documentation governance aligned with company and client requirements. Ensure project data integrity and documentation is accurate, timely and coordinated.
- Identifies project delivery resources from pre-qualified lists or through individual project qualification process; conducts standard to complex request for proposals; completes bid analysis; leads evaluation interviews, recommends resources to clients.
- Leads project delivery resources/team (typically larger more experienced team) providing project guidance and direction to achieve project goals.
- Prepares project schedule with the Project Superintendent. Gathers input from project team and utilizes Lean principles as appropriate. Develops and updates project schedule for both preconstruction and construction activities. Manages materials, labor and procurement logs to ensure appropriate resources are available to meet the project schedule.
- Prepares monthly cost and margin forecast with input from superintendent and reviews with the project team. Participates in the development of the project budget. Regularly reviews costs relative to the budget and highlights discrepancies to enable improved financial performance.
- Perform root cause analysis for deviations and implement robust Corrective Action Preventative Action (CAPA) in a timely manner to prevent recurrence of issues.
- Provide technical oversight and leadership for key related processes such as mechanical integrity for the facilities, pest control program, etc. Serve as the main point of contact with contract GMP Engineer and maintenance personnel.
